Quality Indicators

The quality management plan of the project has been a good contribution along the partnership, progress, budget, financial resources and a very positive attitude towards the quality objectives of every work package. Additionally, every partner individually uses quality criteria for the accomplishment of the objective tasks that are.

The criteria are well understood and available. In general, all the quality objectives have been met and the final project results, the completion of the project partners, all the financial activities carried out at the project level exceeded successfully in a very satisfactory level of quality.

Results of the quality assessment

Evaluation of project management and meetings

The results of the evaluation of project management do not differ significantly between the two assessment periods (2009-2011) and (2012-2013).

The general assessment of the quality of the project management is positive, there are no negative remarks about the partnership and its coordination.

All partners agree that:

- The working meetings have been frequent enough
- They are satisfied with the meetings
- The coordinating team has a very good attitude
- The work packages are effectively managed by the lead partners of each WP
- The skills and expertise of the project partnership is properly utilized to meet the objectives of the work packages
- The work plan has been respected and the changes to the work packages have been discussed and agreed by the partnerships
